

Motor Neurone Disease Study Day

Course Description

This interactive workshop aims to provide core knowledge for Health Professionals either within the primary or secondary care setting. It aims to explore the issues and challenges relating to the practical application of person centred palliative care towards the end of life in MND.

Contents include:

- Current research within MND
- Spasticity
- Secretion management
- Nutrition/gastrostomy
- Oral hygiene
- The carer's experience
- Current research/trials within MND
- Diagnosis, presentation, prognosis

Learning Outcome

By the end of the workshop you will be able to:-

- Have an overall understanding of MND and the role of palliative care.
- Understand and recognise symptoms
- Facilitate conversations around advance care planning.
