

Non-Malignant Study Day

Course Description

This interactive workshop aims to provide core knowledge for Health Professionals either within the primary or secondary care setting. It aims to explore the issues and challenges relating to the practical application of person centred palliative care towards the end of life with a non-cancer diagnosis.

Contents include:

- Heart Failure
- Respiratory Diseases
- Liver & Renal Disease
- Dementia
- Advance Care Planning
- Management of Breathlessness

Learning Outcome

By the end of the workshop you will be able to:-

- Describe the role of palliative care in non-malignant diseases
- Recognise and manage non-malignant disease symptoms
- Facilitate conversations around advance care planning.
